

The Saxon range is smarter and more efficient than ever.

With clever features and breakthrough technology, Saxon's modern design will compliment any contemporary style and still maintain the romantic charm wood heating brings to your home.

Built to last longer with 8mm thick firebox and tough ceramic glass door

The firebox doesn't need to be lined with firebricks. Less maintenance and no replacement costs

All Saxon wood heaters are fitted with a SKAMOLEX™ baffle, pushing the heat back into the fire for a cleaner, more efficient burn

The time-delay fan starts 20 minutes after the heater door is closed, ensuring only hot air is being amplified into the room

Modern design featuring a pull handle and silver accents

15 YEAR FIREBOX STRUCTURAL WARRANTY

One of the best warranties in the business, for peace of mind.

How the Saxon System Works

- Primary air from the room enters the firebox and into the air wash
- Pre-heated air travels through the air wash and across the door glass, keeping smoke away and the door glass clean

- Pre-heated secondary air is introduced to the fire, facilitating further combustion and fast ignition on reload for a cleaner burn
- Fan air is forced across the rear and top of the firebox to assist in pushing air away from the heater and into the room

ZERO CLEARANCE INSTALLATION

Refer to instruction manual or website (www.saxonwoodheaters.com.au) for additional information, including minimum clearances and hearth specifications.

SPECIFICATIONS

INSERT	Cabinet (mm)	Fascia (mm)	Approx. Heating	Minimum Hearth (mm)	Top Clearance to Mantle (mm)	Side Clearance to Mantle (mm)	Rear of Fascia to flue center (mm)

Smart innovation meets modern design
Introducing the Saxon range

WOOD HEATER COLLECTION

Turn a boring blank wall into an amazing fireplace without any major re-construction or existing brick chimney. Simply purchase a Zero Clearance box (available separately) with the Saxon Blackwood insert and enjoy the benefits of a built in fireplace without the extensive renovation.

Saxon wood heaters come in a charcoal finish.

BLACKWOOD INSERT

Coverage: Up to 280m²
Peak Heat Output: 14.7kW
Burn Time: up to 7.5 hours
Maximum Log Size: 410mm
Construction: 8mm
Firebox Size: 0.08m³
Zero clearance: Optional
Recommended Hearth:
Maxiheat 1.2m Tiled Hearth (MXTH12BLK2/GRY)
